ED VISITS FOR OVERDOSE INVOLVING MEDICATIONS OR DRUGS WITH DEPENDENCY POTENTIAL

## Med/Drug^ Overdose ED Visits by Med/Drug Class: Gaston County, 2019\*

Trend lines shown for Med/Drug classes having a monthly average  $\geq 3$  visits. It is important to note, if a Med/Drug class is not shown, it does not mean there were no visits, but that the monthly average is less than 3.

^Report is based on initial encounter, **unintentional** and **undetermined** intent cases only, for ICD10CM overdose codes of drugs and medicaments with dependency potential within **T40, T42, T43, T50.7, and T50.9**.

**Note:** Report is restricted to N.C. residents between the ages 15 to 65 years. Drug classes shown are not mutually exclusive, a person may have more than one drug overdose diagnosis code, therefore, a person may be represented in multiple lines in the graph above. \*2019 data is provisional; YTD (Year to date).

**Note:** NC DETECT is North Carolina's statewide syndromic surveillance system. There may be data quality issues affecting our counts. For training on NC DETECT, contact Amy Ising, [ising@ad.unc.edu](mailto:ising@ad.unc.edu).

**300** Overdose ED Visits for Med/Drugs^ with Dependency Potential in Gaston County, 2019\*

compared to **356** Jan to Dec 2018

Data Source: NC DETECT: ED; Syndrome: Overdose: Unintentional/ Undetermined Medication or Drug Overdose (>14/<66) (ICD-9/10-CM)
